We help contractors become the partner their client trusts

THE SHIFT

Price and program still matter, but clients now choose a collaborative partner they can trust. If two bidders had the same price and program, what would make one of them the winner?

WHAT WE DO

We bring a client-centric lens to everything the team does, and we shift the team's mindset so it sees the project from the client's side.

HOW WE DO IT

Strategy and positioning

Competitors, win themes and how the team positions itself.

Cultural alignment

Turning partner companies into one team the client can see.

Interactive support

Designing, rehearsing and supporting every client interactive.

Client-lens review

Reviewing submissions and returnables from the client's side.

WHY US

We're client-centric from the first conversation, and we're deliberately boutique, so we stay with our clients from start to finish.

WHY CLIENTS PAY

We increase their chance of winning, for around 2 to 3% of what they spend on the bid.

WHERE WE FOCUS

Rail, energy, data centres and defence, mostly on gold and silver tenders.

You bring the IQ. We bring the EQ. Technical excellence gets you shortlisted, and human connection helps you win.
