

PROPOSAL

Earning Webuild's place on Gold Coast Light Rail Stage 4

EOI strategy, positioning and storyboarding support

Prepared for Webuild
Presented by The Strategy Group | October 2026

Dear Joe,

Thank you for the opportunity to present this proposal, and for the open conversation about where Webuild wants to go next. Gold Coast Light Rail Stage 4 is a modest project by Webuild's standards, but it carries real weight: it is the door into Australia's light rail market and a chance to remind the market who Webuild really is.

We understand the challenge plainly. Webuild has not yet delivered light rail, it will compete against contractors who have, and recent headlines on other projects mean evaluators may arrive with questions already in mind. None of that changes what Webuild brings: more than 20 years of rail delivery, a global network of rail and metro expertise, and people who know how to deliver complex infrastructure for demanding clients. The task is to make that capability visible, relevant and credible through the client's eyes.

That is where we can help. We are not your bid writers. Our role is to help your leadership and proposed team agree on what the client truly needs, rediscover the Webuild story and storyboard every EOI response so it tells one consistent, evidence-backed story. Your team then takes that direction to your writers, and we check in at two key points to make sure the story holds.

We have partnered with leading construction and engineering organisations across Australia for more than 20 years, including Webuild on Sydney Water. We recently used this same storyboarding approach to help a consortium earn its place in the ECI phase of Australia's High Speed Rail project.

We would be delighted to partner with you on this bid and to help Webuild take its first step into light rail with confidence.

Warm regards,

Jeffrey Tobias
Founder and Managing Partner, The Strategy Group

Webuild is seeking to enter Australia's light rail market, starting with Gold Coast Light Rail Stage 4

Background

The Queensland Government is seeking Expressions of Interest from contractors to partner on Gold Coast Light Rail Stage 4 through an Early Contractor Involvement (ECI) model. The EOI is expected shortly, with a response period of around six weeks.

Webuild brings decades of rail and major infrastructure delivery, but has not yet delivered light rail. It will compete against contractors with light rail track records, at a time when coverage of other projects has put its reputation under scrutiny. The EOI must do more than answer questions: it must give the client confidence that Webuild understands their world and will be a partner that is easy to work with.

Our Strategic Approach

- Build a clear picture of what the client needs, values and will not compromise on
- Help Webuild rediscover its story and define evidence-backed win themes
- Storyboard each EOI response, linking every person and project to the client's outcomes
- Equip Webuild to brief its bid writers with clear, prescriptive direction
- Review drafts at Weeks 4 and 5 through an independent client lens

Key Benefits

- Transferable experience reframed as a credible strength, not a gap
- One consistent, client-centred story across every response
- A proposed team the client can picture working alongside
- Skills your team keeps for future bids, not a one-off rewrite

THE STRATEGY GROUP

webuild

Three challenges Webuild must address head-on in its EOI

Each one is real, and each one can be turned into a reason to choose Webuild.

01

NO LIGHT RAIL TRACK RECORD

Competitors will point to completed light rail projects. Webuild cannot, so the EOI must show why its experience transfers and what it has learned that applies directly to Stage 4.

Our response

Present Webuild's rail portfolio like a strong CV for a career move: transferable skills, global knowledge sharing and named people.

02

A REPUTATION UNDER SCRUTINY

High-profile challenges on other major projects are well known in the market. Evaluators may read the EOI looking for reassurance on delivery, cost and transparency.

Our response

Help Webuild lead with who it is: its values, how it works with clients and what it has learned, backed by evidence rather than claims.

03

A FIELD OF EXPERIENCED COMPETITORS

Contractors with light rail experience, including those who delivered earlier stages, will be in the field. After reported cost pressures on Stage 3, the client will want a partner it can trust.

Our response

Differentiate on partnership: a client-centred team that puts cost certainty and genuine collaboration at the heart of every response.

Light rail is new, but delivering rail for demanding clients is not

Like a strong CV for a career move, the EOI must show how existing capability transfers. These hypotheses will be tested and evidenced in Workshop 1.

WHAT WEBUILD BRINGS	WHAT IT COULD MEAN FOR STAGE 4
More than 20 years of rail delivery	Proven track, systems and integration capability, applied to a light rail network
Access to the Webuild Group's global rail and metro expertise	International light rail and metro knowledge shared directly into the ECI
Delivery in live, complex environments	Construction planned around an operating network, residents, businesses and visitors
Major project governance, safety and risk management	Confidence on safety, programme and cost, when budget certainty matters most
Experience working collaboratively with major clients	A partner ready to co-develop the best solution with the client during ECI

What we expect the client will look for in an ECI partner

Early hypotheses, to be confirmed against the EOI documents and the client's own language once released.

01

Cost certainty

After cost pressures on Stage 3, the client will want evidence of disciplined estimating, transparent reporting and early risk identification.

02

Minimal disruption

Stage 4 extends an operating network through busy coastal communities. Protecting residents, businesses and visitors during construction will matter.

03

A genuine partner

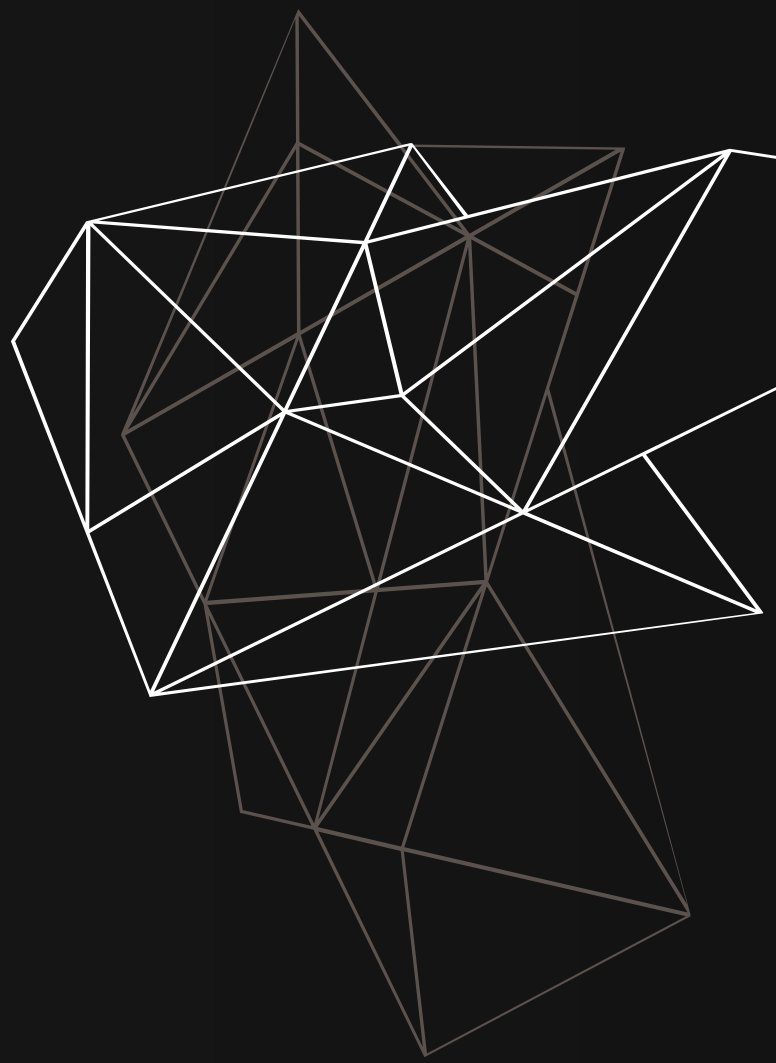

ECI rewards contractors who listen, share ideas openly and solve problems with the client, not those who simply respond to scope.

04

A team they can trust

The client will want to meet the real team: named people who are available, locally present and committed from ECI through delivery.

Workshop 1 tests these against the EOI so Webuild's win themes are built on fact, not assumption.

01 Our Understanding of Your Needs

02 Why The Strategy Group

03 Our Approach

04 Our Experience and Team

05 Investment

A proven approach to helping contractors stand out through the client's eyes

AN OUTSIDE-IN, CLIENT-CENTRIC PERSPECTIVE

Contractors are experts in delivery. What is harder to do from within is see the bid through the client's eyes. We bring that outside-in lens, grounded in human-centred design, so every response speaks to what the client needs to feel confident.

A STORYBOARDING METHOD YOUR TEAM OWNS

We do not write the bid. We teach your team how to build each response around the client, then give you prescriptive storyboards to brief your writers. The skills stay with Webuild long after this EOI is submitted.

WE KNOW WEBUILD, AND WE KNOW RAIL

We have worked with Webuild on Sydney Water and alongside contractors on Sydney Metro and Australia's High Speed Rail project. We understand rail procurement, ECI models and what evaluators look for.

Clear roles: we shape the strategy, Webuild owns the EOI

A clear division of work avoids duplication and keeps the story in Webuild's hands.

The Strategy Group	Webuild leadership and proposed team	Your bid writing team
• Research the client and its priorities • Facilitate the discovery and storyboarding workshops • Develop win themes and question-by-question storyboards • Review drafts through an independent client lens	• Share the Webuild story, values and evidence • Confirm the real proposed team and availability • Own the win themes and storyboard decisions • Brief the bid writers using the storyboard outputs	• Write and produce the EOI responses • Apply the storyboard direction to every answer • Manage compliance, formatting and submission • Incorporate feedback from the Week 4 and Week 5 reviews

Workshops are designed for Webuild's leadership and proposed delivery team, so your people can speak openly and own the outcome.

We have successfully partnered with leading construction companies in Australia

We partner with Australia's leading engineering, construction and infrastructure organisations to strengthen client focus, lift tender performance and deliver better project outcomes, combining strategy, customer experience and innovation expertise built over more than 20 years.

02 Why The Strategy Group

03 Our Approach

04 Our Experience and Team

05 Investment

Our approach: three focused stages across the six-week EOI period

STREAMS	1. DISCOVER & POSITION	2. STORYBOARD	3. REVIEW & REFINE
	Weeks 1-2	Weeks 1-2	Weeks 4-5
KEY ACTIVITIES	**CLIENT RESEARCH** • Review the EOI documents, project information and public commentary • Map the client's objectives, challenges and non-negotiables **WORKSHOP 1: DISCOVERY (FULL DAY)** • Understand the client and test our hypotheses • Rediscover the Webuild story: values, strengths and what keeps clients coming back • Develop and stress-test evidence-backed win themes	**TEAM AND CV ALIGNMENT** • Confirm the team Webuild will actually resource (target 75-80% on the project) • Rapid exercise: each team member draws out the experience most relevant to Stage 4 **WORKSHOP 2: STORYBOARDING (HALF DAY)** • Storyboard each EOI question: the ask, the need, Webuild's answer and the proof • Link every person and project back to the win themes **WRITER BRIEFING PACK** • Prescriptive, self-explanatory storyboards to brief your bid writers	**WEEK 4: ALIGNMENT CHECK** • 1 to 2 hour review of early drafts • Are we telling the story, or just answering the question? • Realign direction early where needed **END OF WEEK 5: CLIENT LENS REVIEW** • Independent review of the draft final, read as the client would • Prioritised recommendations and debrief ahead of Week 6 submission
THE QUESTION	*What does the client need, and who is Webuild at its best?*	*How does every response prove it, with people and evidence?*	*Will the client believe it, and choose Webuild?*
OUTCOMES	• Client priorities map • Agreed Webuild positioning • Evidence-backed win themes	• Question-by-question EOI storyboard • Team and project evidence matrix • Writer briefing pack	• Draft alignment feedback • Client lens review and prioritised recommendations

Workshop 1: Rediscovering who Webuild is, through the client's eyes

Full-day facilitated workshop with Webuild leadership and the proposed team | Weeks 1-2

01 UNDERSTAND THE CLIENT

What does the client need from its ECI partner?

- Unpack the EOI, its evaluation criteria and the client's language
- Map objectives, challenges and non-negotiables
- Identify what Webuild must prove to earn confidence

02 DISCOVER WEBUILD'S STORY

Who is Webuild, at its best?

- Explore values, culture and what keeps clients coming back
- Surface the projects, people and lessons that transfer to light rail
- Address the reputation question openly, with evidence

03 DEVELOP THE WIN THEMES

Why should the client choose Webuild?

- Bring client needs and Webuild strengths together
- Test each theme: is it relevant, distinctive and provable?
- Agree three to four themes to carry through every response

Outputs: client priorities map | Webuild positioning statement | agreed win themes with supporting evidence

Workshop 2: Storyboarding every response before a word is written

Half-day working session with the proposed team, straight after Workshop 1 | Weeks 1-2

For each EOI question, we work through five prompts together

1 The ask

What is the client asking, and why?

2 The need

What problem or outcome sits behind the question?

3 Our answer

How do Webuild's approach, people and experience solve it?

4 The proof

Which projects, lessons and facts make it credible?

5 The thread

How does it link back to our win themes?

For example: "Provide three examples of relevant light rail experience"

Rather than listing heavy rail projects, the storyboard shows the challenge each project shared with Stage 4, what the team learned, who from that project is on the proposed team and how Webuild's global light rail expertise will be shared into the ECI. The answer acknowledges the gap and turns it into evidence.

What Webuild receives

- A storyboard for every EOI question
- Clear, prescriptive direction to brief your writers
- A shared language your team can use beyond this bid

Every person, every project, every question: one story woven through the EOI

Person

A named member of the proposed team

Project

Where they have delivered before

Lesson

What they learned that applies here

Client outcome

How it solves the client's challenge

Win theme

The message it reinforces

A real team, not a showcase

Clients notice when proposed teams change after selection. We will help Webuild propose the team it will actually resource, aiming for 75-80% of named people to be on the project, with a clear plan if changes occur.

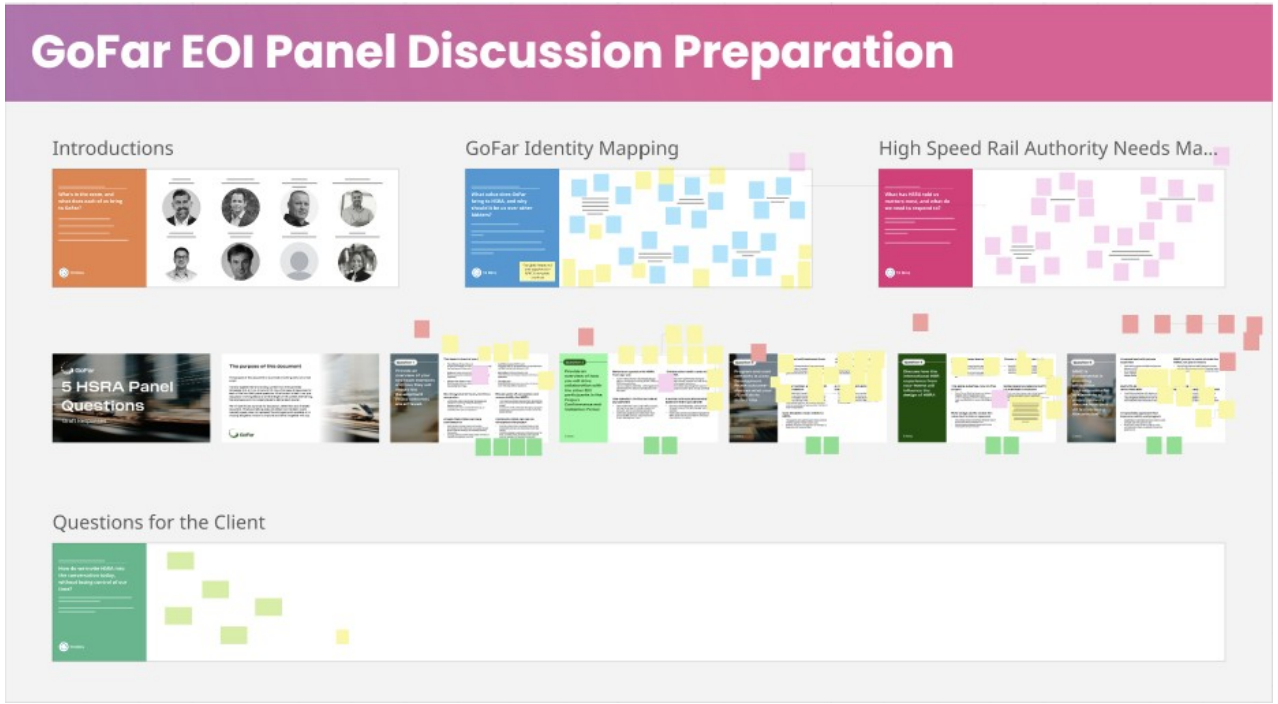

CVs tailored to Stage 4, by the people who own them

Rather than reusing the same CVs bid after bid, each team member draws out the experience most relevant to light rail, cost certainty and collaboration. Your writers then refine, not reinvent.

The goal

"They haven't built light rail yet, but this team clearly understands our problems and can solve them."

We have used this approach to help a consortium earn its place in the High Speed Rail ECI phase

The GoFar EOI panel storyboard, built in person with the core team on Miro

THE BRIEF

As part of its EOI for Australia's High Speed Rail project, the GoFar consortium faced a panel discussion built around five key questions from the client.

WHAT WE DID

- Ran an in-person session with the core team, working live in Miro
- Opened with introductions focused on the value each person brings
- Mapped GoFar's identity: one team, personally invested, with values aligned to the client
- Mapped the client's needs and priorities, in the client's own language
- Storyboarded each of the five questions: themes, key points and evidence, refined with the team

The result

GoFar was shortlisted into the ECI phase. Workshop 2 for Webuild follows the same proven structure.

Two checkpoints to make sure the story holds through to submission

We step back in at the moments that matter most, so drafts stay on course without slowing your writers down.

WEEK 4 1 to 2 hours

Alignment check

A quick review of early draft responses against the agreed win themes and storyboards.

Questions we ask

- Are we telling the story, or just answering the question?
- Does every response link to the client's needs?
- Are people, projects and evidence connected?

Output: Clear, practical feedback to realign drafts early

END OF WEEK 5 Independent review

Client lens review

A review of the draft final, read the way the client's evaluation panel would.

Questions we ask

- Does this solve the client's problem?
- Would we trust this team with our project?
- Is Webuild easy to picture working alongside?

Output: Prioritised recommendations and a debrief, with time to act before Week 6

To make the most of the client lens review, we will need the draft final by the end of Week 5.

THE STRATEGY GROUP | webuild

Indicative six-week timeline, aligned to the EOI response period

Project Stages	Key Activities	Week 1 w/c 2 Nov	Week 2 w/c 9 Nov	Week 3 w/c 16 Nov	Week 4 w/c 23 Nov	Week 5 w/c 30 Nov	Week 6 w/c 7 Dec

Your team: senior, hands-on and focused on Webuild's success

ENGAGEMENT SPONSOR

Jeffrey Tobias
Founder and Managing Partner

Provides strategic oversight and quality assurance, drawing on 30 years of shifting organisations from inside-out to outside-in thinking and TSG's work on Australia's most significant infrastructure bids.

ENGAGEMENT LEAD

Heather King
Manager, Major Projects & Construction

Leads day-to-day delivery and co-facilitates both workshops, bringing construction pursuit experience and a strong understanding of how project teams are experienced by their clients.

AW

STORYBOARDING LEAD

Alycia Wolf
The Strategy Group

Leads the storyboarding method and co-facilitates the workshops, having storyboarded GoFar's EOI panel responses for the High Speed Rail project.

Jeffrey Tobias

Founder and Managing Partner
Engagement Sponsor

What Jeffrey brings to this engagement

- 30 years shifting mindsets at Cisco, AGSM and TSG; the same shift Webuild needs to show the client
- Personal track record on three of Australia's most significant infrastructure JV bids: ETP, LineWide 2 and HTP
- Strategic counterpart to senior leadership on major contractor bids
- Built TSG into a boutique consultancy advising some of Australia's largest entities on their most strategic problems
- Adjunct Professor at AGSM, working with senior executives on transformation and strategic change

Qualifications

- Bachelor of Science (First-class Honours in Computer Science; University Medal), University of NSW
- Ph.D., Computer Science, University of New South Wales

Background

Jeffrey has spent his career working alongside senior executives on their most strategic challenges. At Cisco, he led the global Innovation Thought Leadership team, advising the CEOs of Cisco's top 20 customers on how to shift the mindset of their organisations. At AGSM, he works with the most senior executives in the country on transformation and the largest topics of the day.

The thread that runs through all of this work is mindset shift. Jeffrey has spent 30 years moving large organisations from inside-out to outside-in thinking, and from technical-first to customer-first. That is the shift that will help Webuild stand out on Gold Coast Light Rail Stage 4.

In recent years Jeffrey has personally led TSG's engagements on some of Australia's most significant infrastructure bids: the Sydney Metro Eastern Tunnel Package (JCG JV, $1.6B contract won), Sydney Metro LineWide 2 (CPB-UGL JV) and the Hunter Transmission Project (CPB-UGL JV).

Adjunct Professor of Innovation and Entrepreneurship and AGSM Fellow, UNSW Australian Graduate School of Business.

Relevant Experience

- Eastern Tunnel Package, Sydney Metro: Sponsor and lead coach for the JCG JV (John Holland, CPB, Ghella). $1.6B contract won. Tom Murray (Delivery Director, Sydney Metro): "I have no doubt that The Strategy Group engagement led to the provision of an incredibly well structured, customer-centric proposal."
- LineWide 2, Sydney Metro: Sponsor and lead coach for the CPB-UGL JV across 80+ interactives and multiple major client engagements.
- Hunter Transmission Project: Sponsor and lead coach for the CPB-UGL JV bidding to EnergyCo.
- Cisco IBSG: Global Lead for Innovation Thought Leadership, advising executives of Fortune Global 500 companies on transformation and customer-centric design.

Heather King

Manager, Major Projects & Construction Engagement Lead

What Heather brings to this engagement

- Client and stakeholder engagement
- Strategic bids and pursuit strategy
- Business development and relationship management
- Client experience and service strategy

Qualifications

- Diploma in Construction (Construction Management), Open Polytechnic
- Diploma in Interior Design, The Interior Design Institute

Background

Heather is a Manager specialising in major projects and construction, bringing experience across construction, strategic bids, client engagement, business development and stakeholder management. Most recently at FDC Construction NSW, Heather worked across complex pursuits alongside project directors, pre-construction managers, estimators, consultants and design teams, contributing to over a billion dollars of tendered work and the award of multiple significant projects in under 12 months.

Heather brings a distinct client perspective to major projects. Prior to construction, she spent six years delivering Qantas Business and First Class service to high value customers, developing a strong understanding of client expectations, relationship management and service experience.

This combination enables Heather to understand both how project teams operate and how they are experienced by the client, helping teams articulate their value and present themselves with greater clarity and impact.

Relevant Experience

- Worked across construction pursuits in commercial, industrial, education, health and government sectors
- Coordinated complex submissions with project directors, estimators, pre-construction managers, consultants and designers
- Managed the full tender lifecycle across D&C, construct only and other procurement models, from opportunity to debrief
- Developed strategic project narratives, tailored proposal content and positioning to communicate team capability and client value
- Built and maintained client relationships across the construction sector, supporting repeat business
- Founder of a wearable technology venture, leading commercial strategy, R&D partnerships and investor engagement

Transforming Technical Strength into a Winning, Customer-Centric Workshop

Case Study

webuild

Challenge

Webuild, a global construction and engineering firm, was shortlisted for a major Sydney Water infrastructure contract requiring a scenario-based client workshop. With all proponents technically strong, Webuild needed to differentiate through customer-centric behaviours, collaborative facilitation, and confident scenario management - covering ATU capacity reduction, sludge management, and brine pipeline decisions - while demonstrating clear alignment to Sydney Water's values and evaluation criteria.

Approach

Coaching Webuild to lead with customer-centricity under competitive pressure

The Strategy Group designed and delivered an intensive 4-day preparation program structured across four phases:

1. Scoping & Design
2. Content Development & Planning
3. Rehearsal & Refinement
4. Final Runthrough

Activities included deep-dive scenario analysis to translate technical solutions into client-focused messaging, development of supporting visuals and interactive facilitation tools, and multiple full rehearsals under realistic workshop conditions.

Coaching focused on collaborative behaviours, leadership presence, active listening, and structured risk-opportunity framing across all three scenarios.

THE STRATEGY GROUP

webuild

Outcomes

Positioning Webuild as Sydney Water's partner of choice

- Client-focused messaging developed for all three workshop scenarios with consistent narrative and risk-opportunity framing
- Webuild team coached and rehearsed to demonstrate collaborative behaviours aligned to Sydney Water's evaluation criteria
- Workshop design incorporating innovative facilitation methods to create co-design moments with Sydney Water
- Team equipped with confidence, clarity, and cohesion to deliver a compelling, customer-centric workshop performance

Embedding Customer-Centricity to Win: Eastern Tunnel Package

Case Study

Challenge

The three joint venture (JV) partners (John Holland, CPB Contractors, and Ghella) have been involved in a series of tenders for Sydney Metro over the last years. After unfortunately not being awarded the most recent project, the JV partners engaged The Strategy Group to strategise on what needs to change in their tender process to maximise their chances of success with new Eastern Tunnelling Package (ETP) tender, adopting a more "client- & user-centric" approach.

Approach

As part of our involvement, we embedded the five principles within the tender team:

1. **Delighting the customer:** Focusing on being customer centric with every aspect of the project ultimately drove the best solutions. The change in mindset was further realised through the customer value proposition we co-created.
2. **Empathetic communication:** Ensuring 2-way communication enabled the team to be on the same page throughout the tender process. Asking open questions allowed JCG JV to truly understand the project's needs.
3. **Leadership advocacy:** Having the project leaders fully on board with their customer-centric strategy encouraged the rest of the team to trust the direction they were heading in. Through leading by example and living the values of customer centricity, the whole team was empowered to embody these values in their practice.
4. **Clear messaging and storytelling:** Reiterating the central message of delighting the customer and approaching problems with empathy engrained the CX mission within every team member.
5. **Iterative problem solving:** By planning, designing, building, testing and refining ideas, we delivered a technically superior solution that met the needs of Sydney Metro and the community.

Outcomes

Organisation-wide culture change to drive growth and customer-centricity

The two joint venture (JV) partners won the $1.6bn contract to dig the final tunnel section of Sydney Metro West under the city's central business district (ETP).

Sydney Metro mentioned that they have been 'delighted' by the joint venture partners along the tender process and that the great level of collaboration between their team and the JV partners team was a critical factor in the decision to award the contract.

Embedding Customer-Centricity to Win – Sydney Metro West Linewide

Case Study

Challenge

The CPB and UGL joint venture was competing for the Sydney Metro West Linewide 2 tender in a market where Sydney Metro had raised its expectations of delivery contractors - demanding open collaboration within an increasingly rigid and risk-averse contractual environment. The JV recognised that winning would require doing things differently: revitalising their tender process, adopting a more customer-centric mindset, and demonstrating to Sydney Metro that they were the most competitive and innovative provider.

Approach

Embedding a customer-centric mindset and a unified team strategy to transform how a JV engages with its client

The CPB and UGL joint venture needed more than a strong technical submission - they needed a fundamentally different way of engaging with their client. Working alongside the bid team, we ran a strategy workshop that brought the JV together around a shared purpose, built a clear picture of what Sydney Metro needed and expected, and co-created a unique selling proposition that would set them apart from the competition. From there, we embedded customer-centric thinking across the team through bespoke training and coaching, equipping every member to communicate with empathy and engage the client with confidence.

As the tender progressed, we worked alongside the team through each stage of client engagement - preparing them for technical interactives, participating in planning sessions, coaching on presentation style, and debriefing after each touchpoint to embed learnings and sharpen performance. We reviewed the written submission to ensure messaging was consistent, compelling, and aligned to the strategy the team had built together. The result was a bid team that presented as genuinely cohesive and client-focused - reflecting exactly what Sydney Metro had signalled it was looking for.

THE STRATEGY GROUP

webuild

Outcomes

A bid team transformed in mindset, capability, and cohesion

The engagement produced a measurable shift in how the JV team approached their client. Where the team had previously led with technical expertise, they emerged from the process with a shared strategy, a clearly articulated purpose, and the skills to engage Sydney Metro with empathy and intentionality.

Across every interactive, the team grew more confident and consistent - debriefs sharpened their approach, coaching lifted their presence, and the discipline of customer-centric thinking became embedded in how they worked together. The written submission reflected that same coherence, with clear messaging aligned to a strategy the whole team owned.

Sydney Metro: “As the customer, it was apparent how significant a role The Strategy Group played in shaping the mindset and strategy”

“The Strategy Group were engaged by one of the contracting partners on Sydney Metro to provide strategic advice and guidance during the tender period.

As the customer, it was apparent how significant a role The Strategy Group played in shaping the mindset and strategy. In doing so, the contracting partner was able to demonstrate that the needs of the customer were being met and that the customer requirements were at the forefront of theirs.

I have no doubt that The Strategy Group’s engagement led to the provision of an incredibly well structured, customer-centric proposal…it was a mindset shift and something that the industry needs to see more of.”

Tom Murray

Delivery Director - Eastern Tunnel Package Sydney Metro West

01 Our Understanding of Your Needs

02 Why The Strategy Group

03 Our Approach

04 Our Experience and Team

05 Investment

Investment

We have kept this engagement focused and efficient, recognising that EOI costs are funded by Webuild. The fixed fee below covers all three stages of our support across the six-week EOI period.

Project Steps	Key Outputs	Investment (excl. GST)
EOI Strategy and Storyboarding Support		
1. Discover & Position	• Client research, full-day Workshop 1, client priorities map, Webuild positioning and win themes	$11,000
2. Storyboard	• Team and CV alignment, half-day Workshop 2, question-by-question storyboards and writer briefing pack	$8,000
3a. Week 4 Alignment Check	• Review of early drafts against the storyboards, with realignment feedback	$2,000
3b. Week 5 Client Lens Review	• Independent client lens review of the draft final, prioritised recommendations and debrief	$4,000
Total		**$25,000**

All fees exclude GST. Bid management, writing, compliance and production remain with Webuild and its bid writing team. Scope will be confirmed once the EOI documents are released.

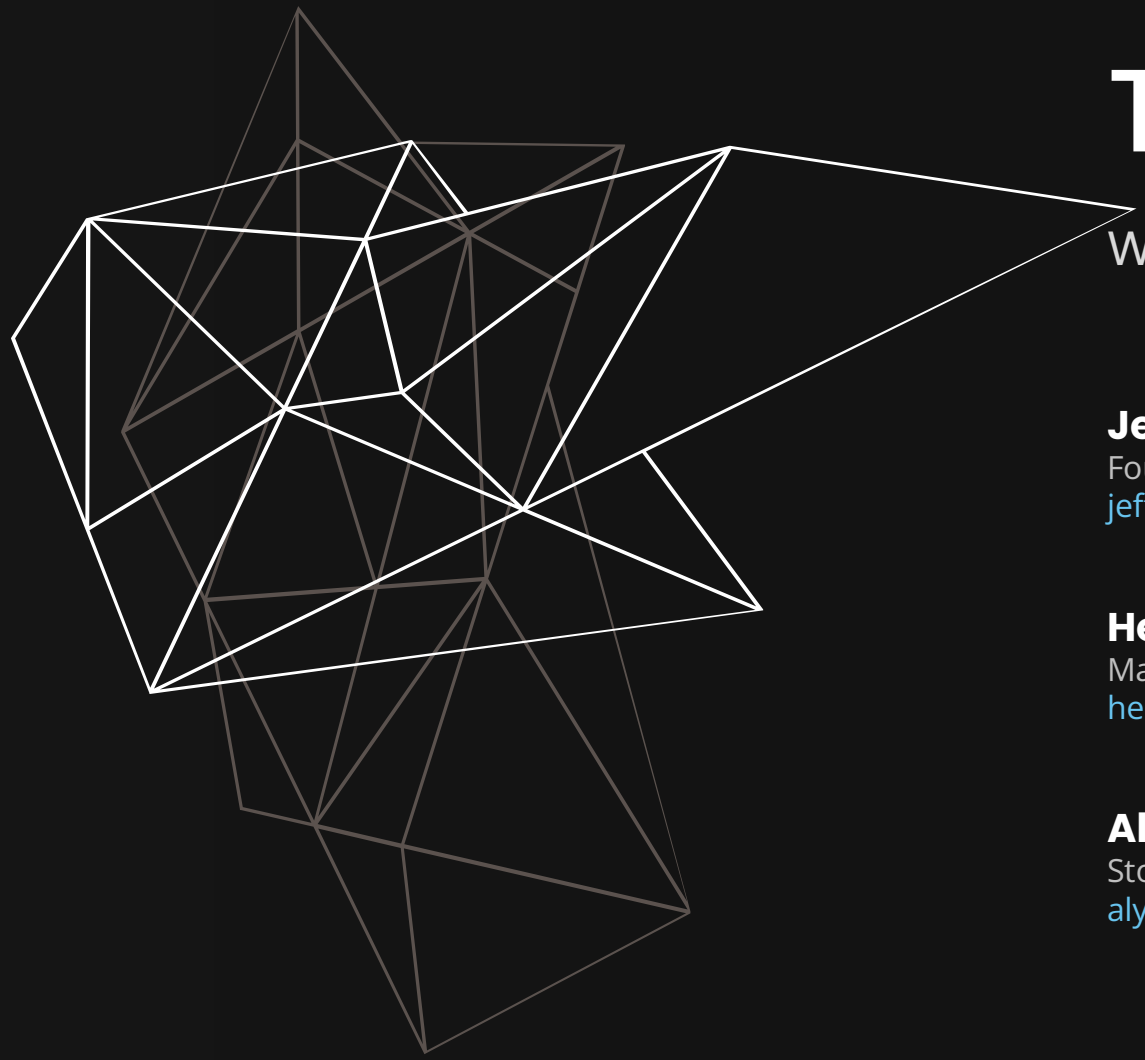

Assumptions and next steps

KEY ASSUMPTIONS

- The EOI response period is around six weeks; timing will be confirmed once the documents are released
- Workshops are held in person, with Webuild leadership and the proposed delivery team attending
- Workshop 1 (full day) and Workshop 2 (half day) run on consecutive days in Week 1 or 2
- Bid writing, compliance and production remain with Webuild and its bid writing team
- Webuild provides the draft final for review by the end of Week 5
- Any change to scope, once the EOI questions are known, will be agreed with you before work proceeds

NEXT STEPS

1. Confirm this proposal and the engagement scope
2. Share the EOI documents as soon as they are released
3. Lock in workshop dates and participants
4. Provide current CVs and project sheets for the proposed team

Thank you

We look forward to working with you
